

## MTA signs agreement to acquire majority stake in EFI Technology

*Codogno (LO), Italy, 20 January 2025.* MTA, a multinational company renowned for the development and production of a wide range of electrical and electronic products for the automotive world, announces the signing of the agreement for the acquisition of 60% of the shares of EFI Technology, an Italian company global leader in the development and production of Powertrain Control Systems for both combustion and electric vehicles. In addition to powertrain control systems, core business of EFI Technology, the company's range includes battery management systems (BMS), inverters, body computers, active suspension controls.

The current shareholders of EFI Technology continue to hold the 40% of the company's shares, maintaining their management and operational roles. The transaction is expected to be completed in the coming weeks.

This transaction confirms MTA's willingness to increase its offer of solutions intended for OEMs, already highlighted with the previous acquisitions of EDN S.r.l. in 2023 (On-board Battery Charger and power converters for electric and hybrid vehicles) and the Calearo S.p.A. business unit in 2024 (antennas and wireless connectivity solutions).

Antonio Falchetti, Executive Director of MTA, comments as follows: "This acquisition, in line with previous ones, contributes to a further increase in our product range and strengthens the international role of MTA, particularly in strategic markets such as India and China, where EFI Technology boasts a strong presence, and MTA already owns production facilities."

Piero Campi, CEO of EFI Technology, comments on the acquisition as follows: "EFI Technology's shareholders have found in MTA an entrepreneurial group with family roots that we are certain represents the ideal partner for the company's future development, thanks to the important synergies that we will be able to bring into play both in terms of the sectors covered by the products and of sharing strategic reference markets."

With the acquisition of the majority share of EFI Technology, MTA Group adds expertise in the field of electronics for actuation and engine control too, thus being able to represent ever more, a Solution Provider of innovative systems for global OE Manufacturers.

MTA was assisted by Andersen Italia as financial advisor while EFI Technology's shareholders were assisted by Credem Euromobiliare Private Banking, as exclusive financial advisor, and by Russo De Rosa Associati for all legal aspects of the transaction.
