

## MTA

### Customizable dashboards, displays and control units

*Atlanta (Usa), October 28<sup>th</sup>, 2019.* MTA a multinational company, headquartered in Italy, known for the development and production of a wide range of electromechanical and electronic products sold to major vehicle manufacturers, is showcasing during the North American Commercial Vehicle Show (Hall B1, Stand 4045) its full range of customizable dashboards, displays and control units.

Today, MTA range of electronic off-the-shelf products that can be quickly and easily customized by OEMs, thanks to user-friendly software tools, can be supplied with 12 Vdc or 24 Vdc and includes 11 different dashboards and displays and 2 control units. All dashboards and displays – Spot, Quik, Quik Plus, Revo, Revo Plus, Smart, Idea, Zip, Giotto, Giotto K and Leonardo – feature very similar hardware and software architectures, elegant design and modern lines, but are different in shapes and sizes, number of LEDs, inputs and outputs, and screen types. These range from LCDs (segment or dot matrix) to TFTs (3.5" up to 7"), coupled with analog needle indicators, up to 8" or 12" full color TFTs.

The customizable products have been developed with special attention to safety details, such as anti-reflection and anti-fingerprint treatments, thus ensuring perfect visibility even in the harshest environments. Moreover, the use of state-of-the-art components with advanced materials guarantee, together with the above treatments, high resistance to temperatures and vibrations, as well as an IP66 or IP67 degree of protection.

The two control units, Dyna and Actua, designed to drive different types of actuators, can be supplied with 12 Vdc or 24 Vdc and differ from each other by the number of inputs and outputs and the processor computing power (higher for Actua). Both feature an IP67 degree of protection.

With the range of customizable dashboards, displays and control units, MTA reaffirms its leading role in the vehicle electronics field, able to satisfy the OEMs with both custom-made products for large production series, and off-the-shelf ones, that can then be customised, for niche applications.
